YOUR PDF, AT YOUR PACE

Make yourself at home.

Welcome to Quire PDF. Start with a document, find the part you need, and leave a useful mark.

1

Open a document

Choose a PDF from your computer. This welcome guide is a safe place to try the reader before opening your own files.

2

Find your place

Use the page controls or thumbnails to move around. Search for the word reading to find the practice passage on the next page.

3

Settle into the view

Adjust the zoom until the text feels comfortable. Try fitting a whole page or using the available width.

TRY A SMALL EDIT

Leave a useful mark.

The toolbar contains tools for highlighting, adding text, drawing, and adding a signature. Select a tool, then try it in the space below.

A PASSAGE TO HIGHLIGHT

Good reading leaves room for a pause. A sentence can become a question, a detail can suggest an idea, and a small note can help us return to what matters.

YOUR SPACE

Add a short note, draw a line, or try adding a signature here.

Tip: select an added mark to adjust or remove it.

FINISH WITH A COPY

Keep what you changed.

After making changes, download an updated PDF. Give the copy a useful name so it is easy to recognize later.

1

Fill forms where fields are available

Click a form field to type, or click a checkbox to select it. Some PDFs contain only printed lines; those are not interactive fields.

2

Download the updated document

Use the viewer's download control to save a copy with your changes. Keep your original when you want a clean starting point.

3

Reopen and check

Open the downloaded copy. Check your notes, signatures, and form values before sharing the file.

Ready for your next document.
